

PMS version 4.1.9

- Overview
- Update schedule
- New features
 - 31270: Added functionality to check if text fields not meant to store (credit) card holder data (CHD)
 - 43799: Buttons that should not be active when creating a new (group) reservation are now disabled.
 - 108584: User right 'Adjust group block room types' has been added.
 - 156056: Implemented latest version of Delphi components
 - 177512: User MenuAccess settings are now no longer hidden when "hide unassigned menu items" is enabled. [CR0135254]
 - 180249: Disabled the possibility to change invoice numbers and have separate debtor invoice numbers when a fiscal module is active in the PMS
 - 180257: Removed the zipcode and address fields from the Adyen authentication screen [CR0135118]
 - 180263: Searching and filtering in browse screens is no longer case-sensitive [CR0135064]
 - 185808: Fixed restrictions override functionality on APMA. It now requires entering the Windows password of a user that has override rights.
 - 185813: The PMS is no longer automatically locked during the key-renewal and Credit Card re-encryption process.
 - 186873/205759: The default housekeeping status of a late arrival room after check-in has now changed from "Occupied/clean" to "Occupied/dirty". [CR0135338]
 - 186904: Added a dedicated button to group reservations to be able to view the group block changes log
 - 187437: Checked if version is compatible with Windows11
 - 195892: The invoice module now allows for better filtering making it more useful to work with
 - 198122: Fields for age categories that are not in use should now no longer be showing
 - 198235: Added an option per user in the PMS to be able to use a tab-based structure instead of a windows-based structure for showing different forms
 - 198246: New fields added to the Denial Registration form.
 - 198918: The infotext field in Guarantee plans can now be translated
 - 198921: Added translation option to the description field for cancellation reasons
 - 199790: Improved the logic for extending existing reservations to make sure that the extended rate type is saved properly
 - 200028: Implemented the correct response to the IoT Gateway (OrangeBox) in case of a room move
 - 200555: Added the possibility to link a front office message to a rate type [CR0136010]
 - 200715: [CR0137203] - disable retention of PLU code when posting
 - 200848: Correctly implemented the options to export reports to XML and CSV when exporting and/or mailing reports
 - 200960: Added a column for "UpDownsell" to the group reservation overview screen.
 - 201171: Added an option to designate the default tab that shows when opening a reservation
 - 201223: The date and time when a reservation was verified are now stored in the reservation in the database
 - 201752: An additional tab has been added in the reservation screen for external reservation references.
 - 201884: The ability to mail invoices for departures has been improved.
 - 202141: Additional improvements have been made to the invoice module: the email column will now be filled with the last known email-address the invoice was sent to and the invoice log has been improved. [CR0136882]
 - 202755: Additional age categories can now also be used in the rate query [CR0137119]
 - 203543/203838/205737: Deprecated components to improve application security
 - 204986: The auto-update function in the PMS has now been updated to a newer version of the Delphi development platform
 - 204899/206659: Updated component to latest version to improve application security
 - 204953/206660: The temporary interface user application has now been updated to a newer version of the Delphi development platform
 - 204908/204911/204914: Update IDPMS components to newer Delphi version to improve application security
 - 205481: checked external dll-files for known vulnerabilities
 - 206661/206662/206664/208433: Upgrade PMS to version 12 of the Delphi programming platform to mitigate some vulnerabilities
- Bugs fixed on release
 - 75259: Improved secure handling of Card Holder Data in reservation screens.
 - 107196: Tokenization night audit functionality is now considering only records where a CC number has been added in the last 3 days before execution
 - 146194: Made sure the correct visual items are used for calculators, calendars, etc. in the PMS user interface
 - 171481: Daily rates are now correctly updated when using child young and infant values
 - 177485: Fixed an issue where group blocks without room type could be created [CR0135422]
 - 177716: When extending a rate type that is configured as a package there is no longer an error occurring during night audit.
 - 177987: Fixed a possible bug in deposit ledger configuration causing incorrect behavior
 - 187314: Resolved a bug where not all room numbers were shown when trying to move a room, because of the incorrect evaluation of past dates when checking if the room is occupied [CR0135778]
 - 189854: Reviewed and improved the GDPR purge process for hotels that use shared relations
 - 191089: The manually chosen subfolio when posting now overrules the default subfolio configured for the posted article.
 - 196104: Made a textual change in a warning message for reservation Extras that were added by an external system.
 - 196107: Removed last remnants of the "Owner Accounting" module.
 - 196232: The words "EFT provider" and "Payment provider" were both used referring to the same functionality. This has now changed to use only "EFT provider".
 - 196357: Changed the label of "Communication timeout" in EFT Provider settings.
 - 196414: Improved the queries for retrieving relation history.

- 198130: Made a fix to the Chargeplan Checker so it now takes start- and end dates as well as booking days into account based on the entered parameters.
- 198205: It should no longer be possible to create group block without a rate type.
- 199189: Improved an erroneous flow in the cancellation policy module
- 200718: The article-number field in the article configuration can no longer be changed after the article has been created [CR0136856]
- 200783: Corrected a spelling-error in an error message
- 201253: Fixed an issue with the visibility of transferred items on (proforma) invoices using different consolidation types
- 201447: Applies a fix for a bug that caused errors to appear when using userdefined date fields in search to all userdefined fields [CR0136312].
- 201670: Contact names are now again correctly stored in sales traces [CR0136967]
- 202071: The filter dropdown in the banqueting rack now shows the correct "Booker" caption instead of "Guest"
- 202087: Extended the timeout on the rate query and users now get a warning when they perform a potentially lengthy rate query [CR0136884]
- 202108: Fixed an error that occurred when clicking on a commission posting line in the PMS [CR0136906]
- 202133: Fixed an issue where email address field were populated differently when mailing the same invoice using 2 different workflows [CR0136844]
- 202169: The manual arrival date and manual departure date fields in a group reservation are now mandatory when the banqueting module is active [CR0137048]
- 202178: Data in the allotment grid for a virtual room type will now be correctly updated/deleted when loading the same allotment for a non-virtual room type (and vice versa) [CR0136955]
- 202764: The dropdown for choosing the invoice layout will now be correctly filled when designating the default print layout for invoices [CR0137096]
- 203105: Refreshing of the room rack has been improved to prevent unwanted changes to reservations that have been edited on another workstation while the roomrack was opened [CR0137145]
- 203201: Made postings are now retained in the "Charge general" window until the form is closed
- 203269: The daily rates in reservations are now correctly populated when changing the start date of the used package in that reservation [CR0137094]
- 203488: Users should now be able to transfer payments from a reservation to another reservation again [CR0137153]
- 203496: Reservations can now be linked to future reservations again [CR0136911]
- 203725: Changed a label name for "extras" so it's now the same as the menu item it originates from
- 205109: The NOTLOCAL function in chargeplans (which is used for determining if local taxes should be posted) is now case-insensitive [CR0134123]
- 205387: Fixed the auto-update functionality in the PMS
- 203853: An error that was introduced with the move from version 10 to version 11 of the Delphi development platform has been resolved
- 205904: Resolved an issue where it was impossible to successfully perform a credit card transaction using decimal values for American Express and VISA cards
- 205958: The "Charge General" form is now no longer closed after completing a credit card transaction using Adyen
- 206404: When cancelling a reservation any charge routes to that reservation will be deleted so items are no longer routed to a cancelled reservation [CR0134721]
- 206411: The amount to pay when checking in a reservation that has a balance is now correctly calculated [CR0137222]
- 206416: Rate no longer changes to 0.00 when adding a travelagent that contains a default rate type to a reservation [CR0137250]
- 206447: Fixed an issue where extras were not charged on departure day in case the charge type of that extra was set to 0 [CR0137424]
- 206567: The noticeboard field in activities is now correctly updated when changing its master-activity [CR0137486]
- 206875/207196: Resolved a bug where an extras was incorrectly calculated twice on a proforma when not posted on subfolio A of a reservation [CR0137536]
- 207054: The column "Publish" is now correctly populated in the rate type overview [CR0137643]
- 207156: Mealplans are now correctly evaluated on extended nights for reservations that contain a package [CR0137651]
- 207172: When selecting a package without a package breakdown in a reservation, the PMS no longer produces an access violation error [CR0137680]
- 207390: The e-mail-body when sending an invoice from the PMS is now showing the logo in case it's configured [CR0137158]
- 207427: Fixed an issue where the autoupdate process would produce an error
- 207464/208441: Fixed an error that would occur when running the night audit
- Bugfixes and enhancements after release (per version)

Overview

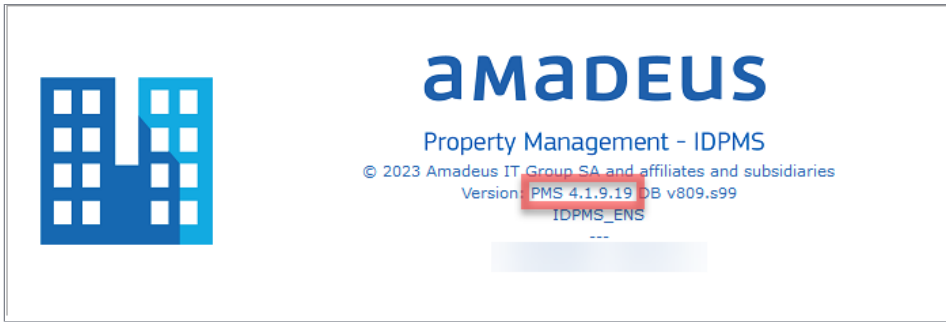

IDPMS version 4.1.9 will include multiple new functionalities, bugfixes and other improvements. More detailed information can be found further down this document.

Min db update version: V820.S3

Note: When installing 4.1.9 at the pilot hotels please make sure that you **do not** install it in the current PMS root folder because the new dll install set is not compatible with 4.1.8 or lower

Update schedule

PMS version 4.1.9 will be delivered to your hotel through the PMS Onpremise Update Module (OPU). For hotels running IDPMS v3.16.4 or higher, the deployment is announced via the PMS-mail module for selected users. The time between announcement and actual update may vary per hotel, as the deployment will be done in smaller batches of hotels.

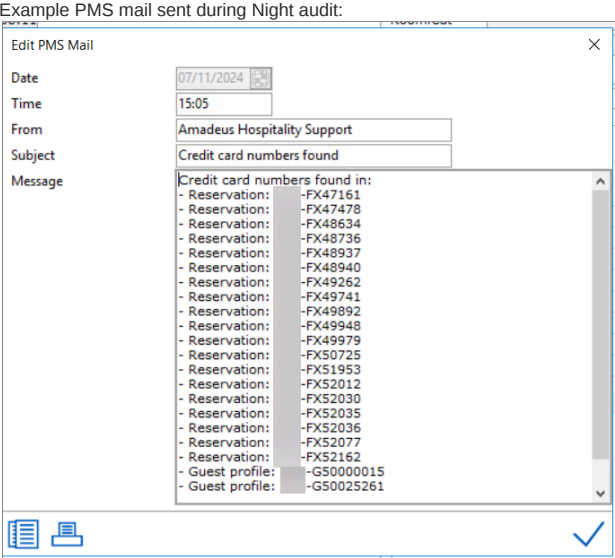

- Hotels that do not have the On-Premise Update (OPU) configured to "FULLINSTALL" will NOT be updated automatically
- Multi-Property environments or hotels that have IDPMS running on a terminal server will also NOT be updated automatically

If the above applies to your hotel or if you would like to have this update scheduled, please contact the Amadeus Support Department to have the update scheduled.

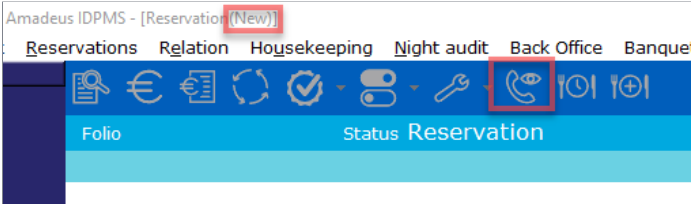

New features

The following pages describe the new features, bugfixes and other enhancements of PMS version 4.1.9.

- 31270: Added functionality to check if text fields not meant to store (credit) card holder data (CHD)
 - Added functionality to validate user input within "open text" fields not designate for CardHolder data (CHD) storage. For example in memo fields or user defined fields.
 - When cardholder data is detected, a message will be given to designated users with a list of the reservation numbers effected.

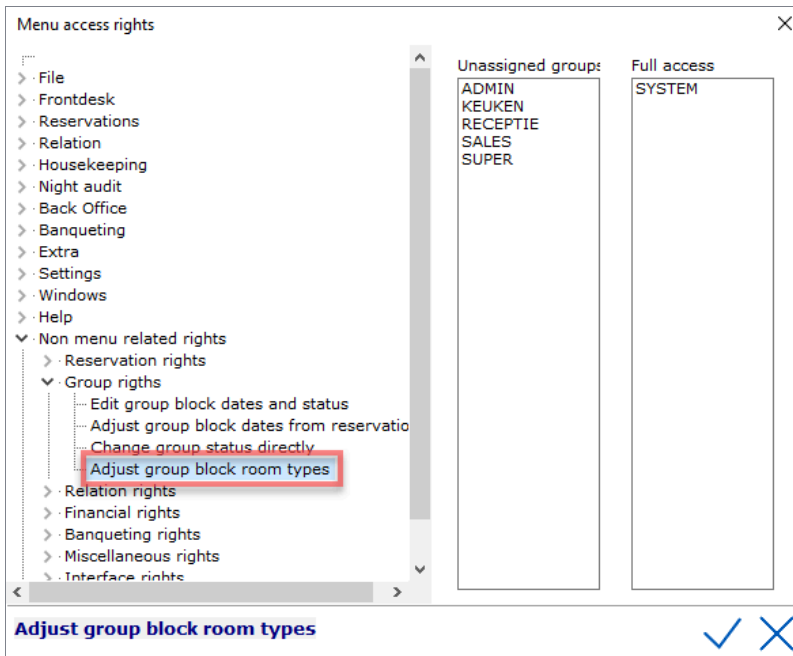

- 43799: Buttons that should not be active when creating a new (group) reservation are now disabled. Active icons are disabled on New Reservations and Group Reservations. For example the Trace icon:

- 108584: User right 'Adjust group block room types' has been added. Users can have the right to change room types in individual reservations that are part of a group block.

Settings > Users > Menu UserAccess
 > Non menu related rights
 > Group rights
 'Adjust group block room types'

- 156056: Implemented latest version of Delphi components

- 177512: User MenuAccess settings are now no longer hidden when "hide unassigned menu items" is enabled. [CR0135254]
When the checkbox "Hide disabled menu items" in Settings > Options > Security is ticked, the setting also affected the HC_MENU_ACCESS menu item in the PMS (Settings > Users > Menu UserAccess).

This resulted in SuperUsers not being able to activate new (and sometimes existing) functionalities as they do not have the permission to view these when a new functionality is added. For example when creating a new autorun procedure.

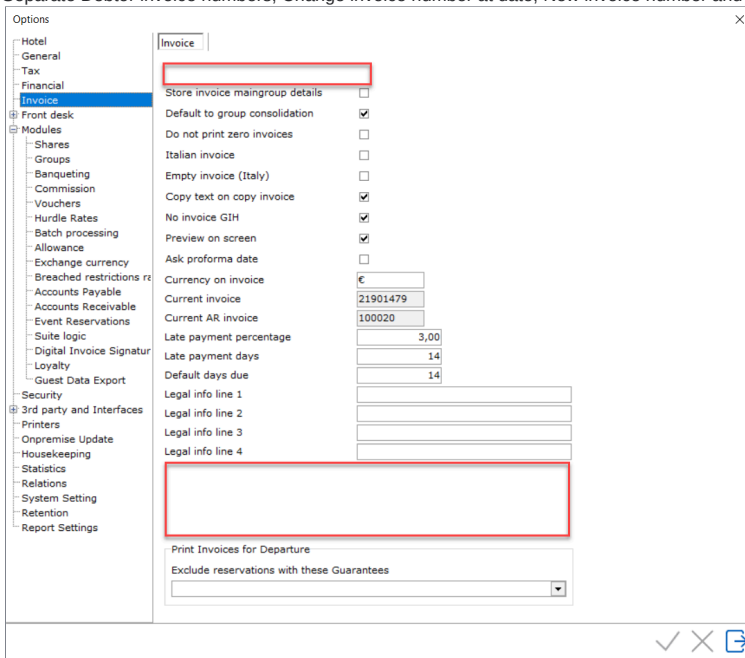

User MenuAccess settings are now no longer hidden when "hide unassigned menu items" is enabled. All items are now always visible for users that have access to User MenuAccess.

- 180249: Disabled the possibility to change invoice numbers and have separate debtor invoice numbers when a fiscal module is active in the PMS

Settings > Options > Modules Module 'Digital invoice signature'

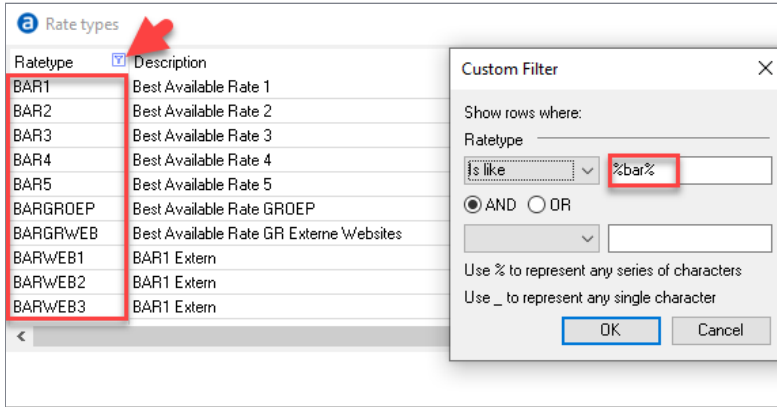

If this module is enabled, the following items are disabled and hidden in Settings > Options > Invoice:

Separate Debtor invoice numbers; Change invoice number at date; New invoice number and New debtor invoice no.

- 180257: Removed the zipcode and address fields from the Adyen authentication screen [CR0135118]

- 180263: Searching and filtering in browse screens is no longer case-sensitive [CR0135064]
For example custom filter on BAR rate types (Settings > Ratemanager > Rate type) is now also working when filter on lowercase %bar%:

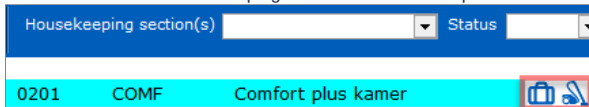

- 185808: Fixed restrictions override functionality on APMA. It now requires entering the Windows password of a user that has override rights. APMA only. Override functionality is linked to active directory.

- 185813: The PMS is no longer automatically locked during the key-renewal and Credit Card re-encryption process.

- 186873/205759: The default housekeeping status of a late arrival room after check-in has now changed from "Occupied/clean" to "Occupied/dirty". [CR0135338]

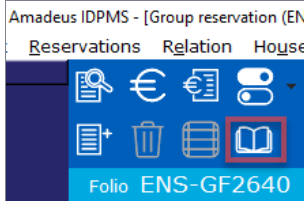

For a late arrival the housekeeping status remained Occupied/Clean until the next audit. This is now changed to Occupied/Dirty at check-in:

This also means that after undoing the check-in the room will no longer be changed to "Vacant/clean" but instead to "Vacant/dirty".

- 186904: Added a dedicated button to group reservations to be able to view the group block changes log

The new icon can be found on the group block bar:

the log displays all changes for the selected group block.
For example:

Date	Time	User	Field Name	Description	Old Value	New Value	Block Date	Room Type	Rate Type
19-10-2023	12:31:41	12:31 Q	BLOCK_REMOVED			X	08-07-2022	COMF	BLOCK
19-10-2023	12:31:41	12:31 Q	BLOCK_SIZE		5	0	08-07-2022	COMF	BLOCK

- 187437: Checked if version is compatible with Windows11

- 195892: The invoice module now allows for better filtering making it more useful to work with
Backoffice > Invoices > Invoices
For example:

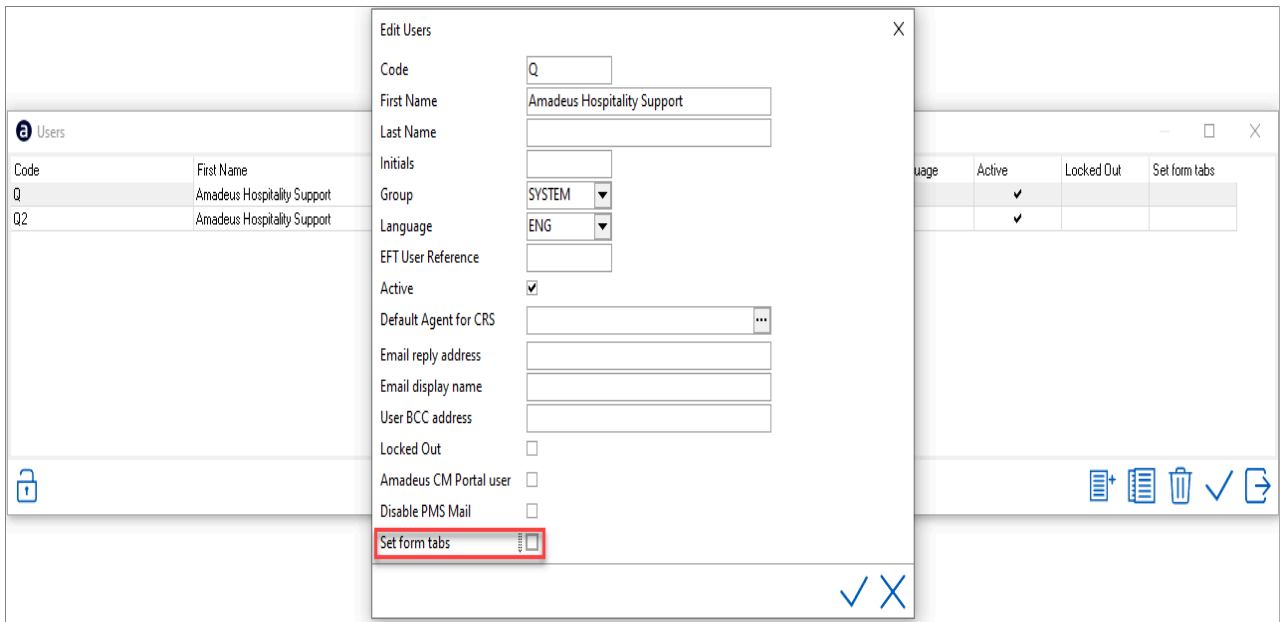

Invoice number	Invoice date	Due date	AR number	Send to	Folio Guest	Amount	Reference	Reference 2	Status	E-Mail address
21901396	05-07-20	(All)	60941	Jan Vis Artiesten en	ENS-F30670	Empel, Dhr. P. van	43,50			
100002	05-07-20	(Custom...)	60126	FC Twente '65 BV	ENS-F31091	Assaidi, Dhr. O.	96,27			
21901406	05-07-20	05-07-2022		Amadeus	ENS-F31268		80,27			
21901402	05-07-20	06-08-2022		Amadeus	ENS-F31268		80,27		X	
21901400	05-07-20	12-07-2022		Amadeus	ENS-F31268		80,27			
21901407	05-07-20	19-07-2022		Amadeus	ENS-F31268		321,08			
21901403	05-07-2022	06-08-2022		Amadeus	ENS-F31268		321,08		X	
21901401	05-07-2022	06-08-2022		Amadeus	ENS-F31268		321,08			

- 198122: Fields for age categories that are not in use should now no longer be showing
Additional age category fields are suppressed when the option for age categories is disabled. For example in chargeplans and rate grid.
In below example, the hotel uses age categories Children and Babies:

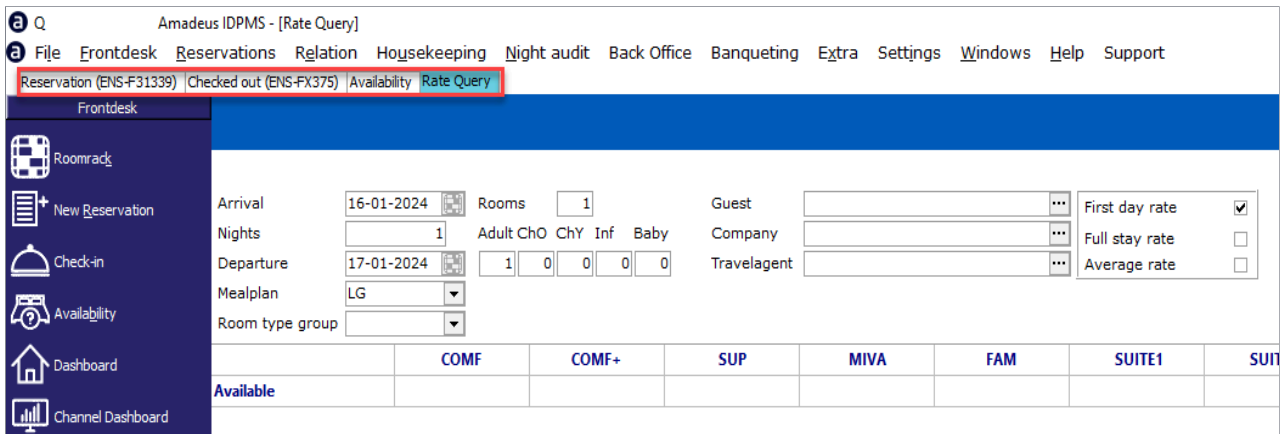

These are the only categories in chargeplans:

- 198235: Added an option per user in the PMS to be able to use a tab-based structure instead of a windows-based structure for showing different forms

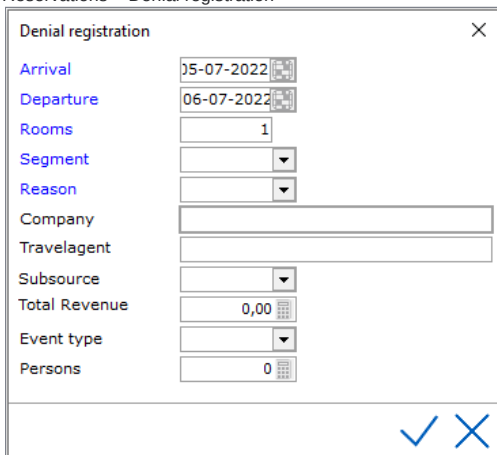

It is now possible to use of tabs instead of Windows in the PMS. This functionality can be set per user.
Settings > Users > User, Set form tabs.

if enabled:

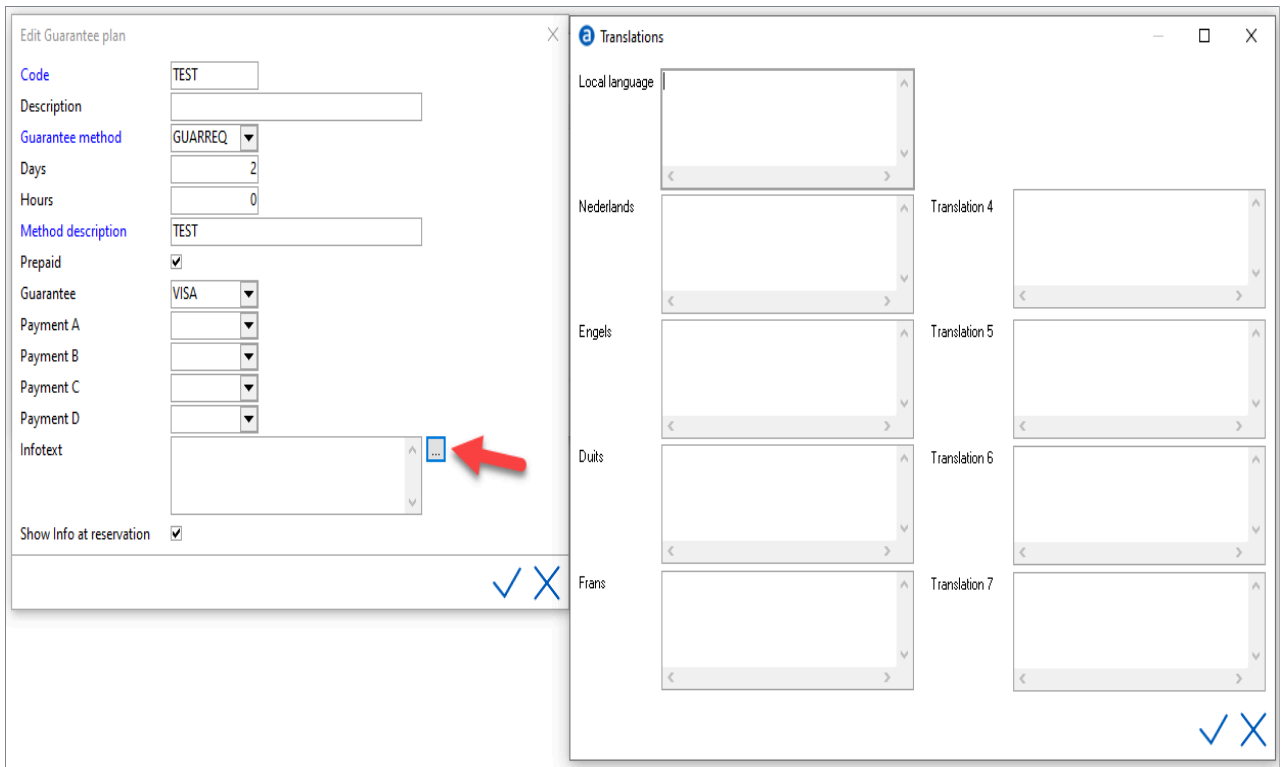

- 198246: New fields added to the Denial Registration form.
Reservations > Denial registration

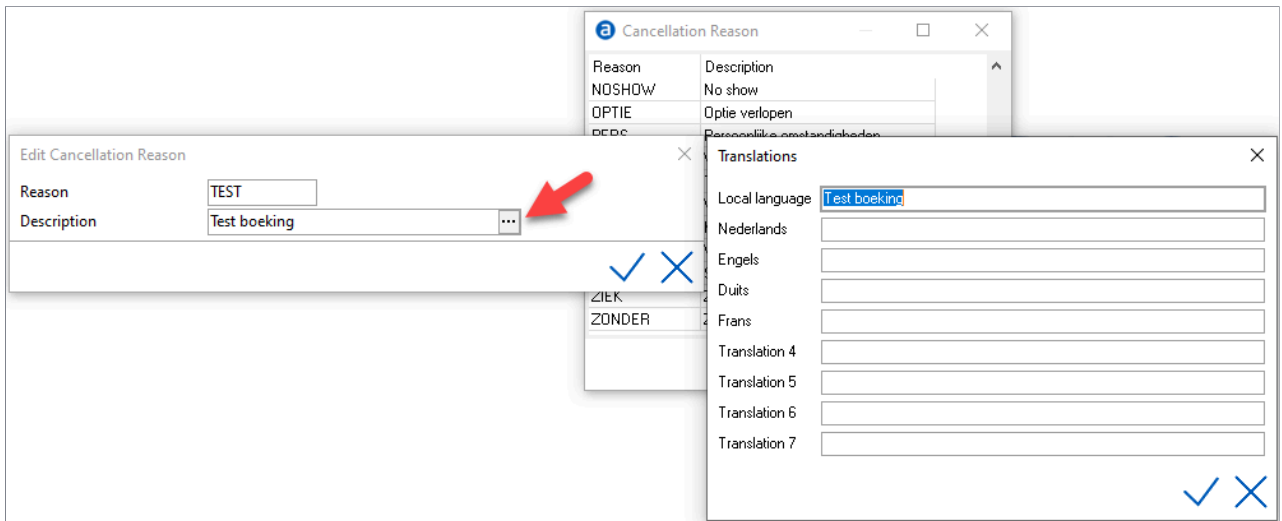

Newly added fields:

- Subsource** - Dropdown linked to configured sub sources (Settings > Statistics > Subsource codes).
- Total Revenue** - Field to enter total revenue.
- Eventtype** - Linked to configured event types (Settings > Banqueting > Picklists > Event type).
- Persons** - Field to enter number of persons (pax)

- 198918: The infotext field in Guarantee plans can now be translated
Settings > Reservations > Guarantee plan

- 198921: Added translation option to the description field for cancellation reasons
Settings > Statistics > Reason cancel

- 199790: Improved the logic for extending existing reservations to make sure that the extended rate type is saved properly
- 200028: Implemented the correct response to the IoT Gateway (OrangeBox) in case of a room move
- 200555: Added the possibility to link a front office message to a rate type [CR0136010]
Settings > Rate manager > Rate type

Edit Rate types (Active from 01-01-2020 until 14-06-2023 with 1261 days loaded) X

Grid icon | ✓ X

A pop up message is displayed on screen when creating a reservation (on exit of the rate type field) or modifying the rate type in an existing reservation. The message is also displayed on check-in.

- 200715: [CR0137203] - disable retention of PLU code when posting
In older versions when making postings the PLU would be reset after making each posting, This was no longer the case but has now been restored to the old behavior. [CR0137203]

- 200848: Correctly implemented the options to export reports to XML and CSV when exporting and/or mailing reports
When saving a report, users can now select CSV as file type:

When emailing a report, XML can now be selected as report format:

Email report

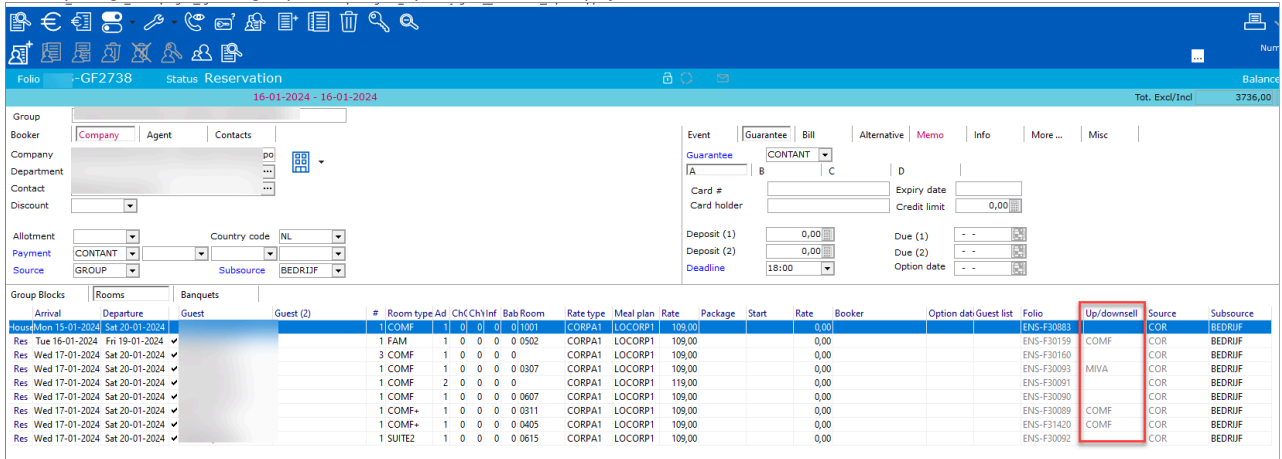

From: _____
 To: _____
 CC: _____
 BCC: _____
 Subject: PMS Report: FD_Arrival

Send email as: HTML mail
 Plain text

Report format: Excel
 PDF
 XML
 CSV

- 200960: Added a column for "UpDownsell" to the group reservation overview screen.

When opening Rooms tab in a group reservation, Up/downsell is now displayed:

- 201171: Added an option to designate the default tab that shows when opening a reservation

Setting 'Default tab' under the front desk to set the default tab in the reservation form. Settings > Options > Front desk.

- 201223: The date and time when a reservation was verified are now stored in the reservation in the database. The date and time are stored in the database (table resfol). It is not visible in the PMS.

Folio -F31435 Status Reservation

Tot. Excl/Incl Balance 0,00
25,00 25,00

- 201752: An additional tab has been added in the reservation screen for external reservation references. The tab is located next to the "daily rates" tab in a reservation.

The screenshot shows a reservation interface with the following details:

- Folio:** -F31339
- Status:** Reservation
- Group:** -GF2849
- Arrival:** 15-01-2024 (Monday) at 14:00
- Nights:** 1
- Departure:** 16-01-2024 (Tuesday) at 12:00
- Guest/Booker:** Name, City (NL), and Company (Amadeus) fields are present.
- Agent:** Fields for name, department, contact, and commission.
- Room Details:**

Num	Roomtype	Adult	Child Old	Child Young	Infant	Baby
1	COMF	1	0	0	0	0
- Rate/mealplan:** CAPG, LO+LP, 130,00
- Package:** --, 0,00
- Discount:** (empty)
- Up/downsell:** (empty)
- Navigation:** Guest History, Userdefined Fields, Daily Rates, **External Folio Reference** (highlighted in red)

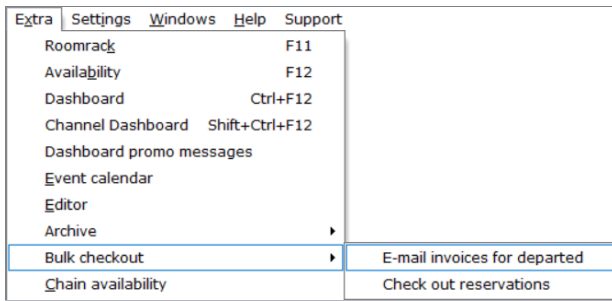

The External reservation references are now also searchable in reservations:

The search window 'Seek' contains the following fields:

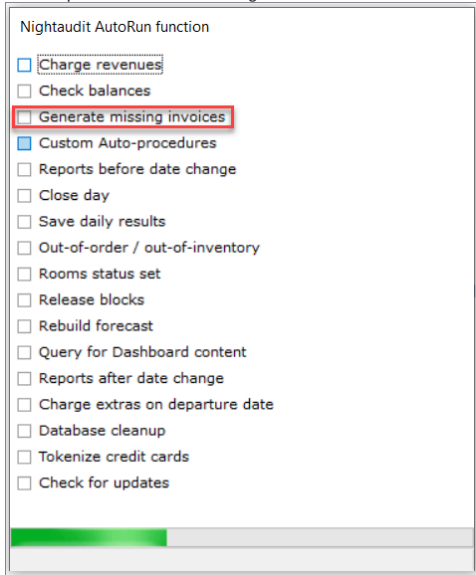

- Folio:** -F
- Arrival date:** --
- Depart Date:** --
- Roomnumber:** (empty)
- Roomtype:** (dropdown)
- Guest:** (empty)
- Company:** (empty)
- Travelagent:** (empty)
- Booker:** (empty)
- Frequent Stay Number:** (empty)
- Group number:** -GF
- Cancellation number:** -X
- Ext. Reference:** (empty, highlighted in red)
- Reference:** (empty)
- Company contact:** (empty)
- Travelagent contact:** (empty)
- Deadline:** (dropdown)
- Authorisatiecode:** (empty)

- 201884: The ability to mail invoices for departures has been improved. It will now also automatically create invoices for any checked out reservations that have 1 or more postings on any subfolio for which no invoice has been created yet.

Extra > Bulk checkout > E-mail invoices for departed

A new option is added in the night audit:

This function only created invoices for checked-out folio's.

When balance = 0, but there's not an invoice yet an invoice will be created. When balance <> 0, an invoice will NOT be created.

Invoices can only be sent to an email when email address is set in the folio (check GUEST/COMP/AGENT bill options)

When invoices cannot be created and/or sent, it will be displayed in the list at the end of the procedure (only when using "Bulk checked-out" menu-item).

At Night Audit it is not shown, but can be obtained using the "Balance Checked out" report under File > Reports > Financial).

- 202141: Additional improvements have been made to the invoice module: the email column will now be filled with the last known email-address the invoice was sent to and the invoice log has been improved. [CR0136882]

Backoffice > Invoices > Invoices

- 203543/203838/205737: Deprecated components to improve application security
Removed dependencies on old OpenSSL libraries to mitigate security vulnerabilities
- 204986: The auto-update function in the PMS has now been updated to a newer version of the Delphi development platform
- 204899/206659: Updated component to latest version to improve application security
- 204953/206660: The temporary interface user application has now been updated to a newer version of the Delphi development platform
- 204908/204911/204914: Update IDPMS components to newer Delphi version to improve application security
- 205481: checked external dll-files for known vulnerabilities
- 206661/206662/206664/208433: Upgrade PMS to version 12 of the Delphi programming platform to mitigate some vulnerabilities

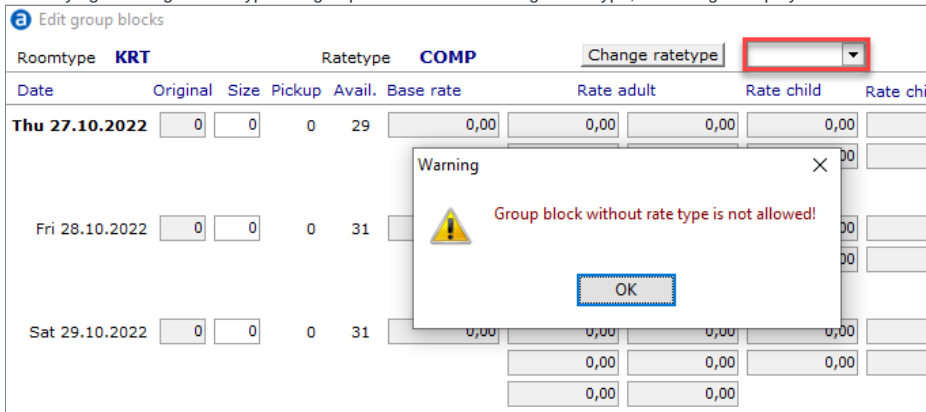

Bugs fixed on release

- 75259: Improved secure handling of Card Holder Data in reservation screens.
- 107196: Tokenization night audit functionality is now considering only records where a CC number has been added in the last 3 days before execution
- 146194: Made sure the correct visual items are used for calculators, calendars, etc. in the PMS user interface
- 171481: Daily rates are now correctly updated when using child young and infant values
When updating the child young and infant values in a reservation, the daily rates are now correctly updated too.
- 177485: Fixed an issue where group blocks without room type could be created [CR0135422]
- 177716: When extending a rate type that is configured as a package there is no longer an error occurring during night audit.
When a reservation containing a package was extended via the room rack "Posting aborted, Article 0 not found" was displayed during the night audit. This issue is now fixed.
- 177987: Fixed a possible bug in deposit ledger configuration causing incorrect behavior
The PMS has two separate options to work with deposits: Generate deposit invoice (Settings > Options > Modules) and Deposit ledger (Settings > Options > Financial).
It is now no longer possible to have both options activated at the same time. The same goes for related settings.
- 187314: Resolved a bug where not all room numbers were shown when trying to move a room, because of the incorrect evaluation of past dates when checking if the room is occupied [CR0135778]
Room number dropdown now gives a complete result when moving a room. The check should be if the room is currently occupied or occupied in the future.
- 189854: Reviewed and improved the GDPR purge process for hotels that use shared relations
When there is a shared relation property for multiple hotels, the PMS now looks at Main Hotel for each shared relation property for GDPR purge.
- 191089: The manually chosen subfolio when posting now overrules the default subfolio configured for the posted article.
It is possible to set a default subfolio in the PMS, when automatically posting (interfaces, night audit, etc.). This is the default subfolio the posting is made to, configured in the postgroup settings (Settings > financial > postgroup).
When manually posting and choosing a different subfolio, the default was still leading and overruled user choice leading to additional actions needed to get the posting to the correct subfolio. This is now changed: on manual posting the choice for subfolio that the user makes is leading.

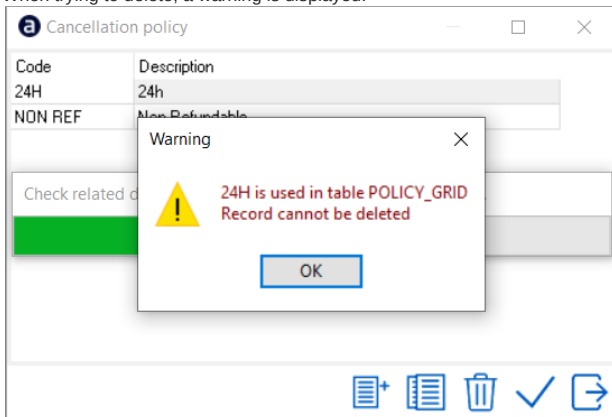

- 196104: Made a textual change in a warning message for reservation Extras that were added by an external system. It is now called 'External Extras':

- 196107: Removed last remnants of the "Owner Accounting" module. The module was removed in 4.1.8, but when active it was still displayed. This is now fixed.
- 196232: The words "EFT provider" and "Payment provider" were both used referring to the same functionality. This has now changed to use only "EFT provider".
Settings > Interfaces > EFT > EFT providers
- 196357: Changed the label of "Communication timeout" in EFT Provider settings.
Settings > Interfaces > EFT > EFT providers
It changed from "Communication timeout (default 90 sec)". to "Communication timeout".
- 196414: Improved the queries for retrieving relation history.
Inefficient queries for fetching revenues are improved.
- 198130: Made a fix to the Chargeplan Checker so it now takes start- and end dates as well as booking days into account based on the entered parameters.
- 198205: It should no longer be possible to create group block without a rate type.
When trying to change a rate type in a group block without entering a rate type, a warning is displayed:

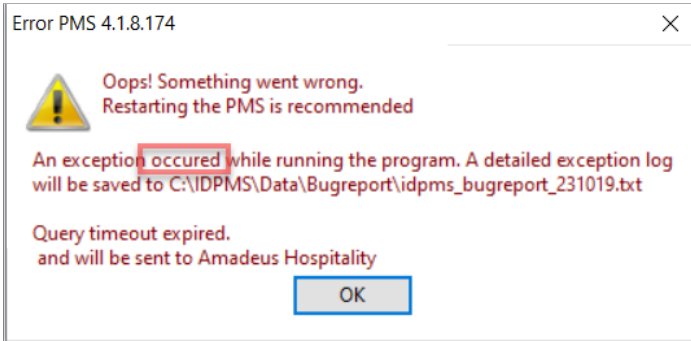

- 199189: Improved an erroneous flow in the cancellation policy module
It is no longer possible to delete cancellation policies when they are still loaded in the policy grid for future days.
When trying to delete, a warning is displayed:

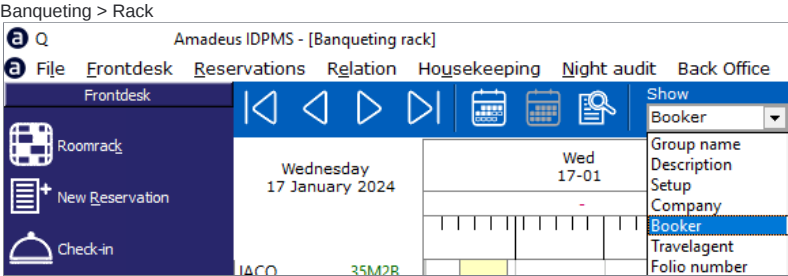

- 200718: The article-number field in the article configuration can no longer be changed after the article has been created [CR0136856]
Settings > Financial > Article

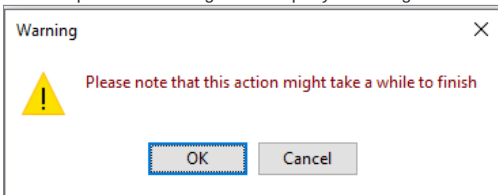

- 200783: Corrected a spelling-error in an error message

- 201253: Fixed an issue with the visibility of transferred items on (proforma) invoices using different consolidation types
- 201447: Applies a fix for a bug that caused errors to appear when using userdefined date fields in search to all userdefined fields [CR0136312].
User defined company field set-up to be visible in search was throwing an error. This issue is now fixed.
- 201670: Contact names are now again correctly stored in sales traces [CR0136967]
- 202071: The filter dropdown in the banqueting rack now shows the correct "Booker" caption instead of "Guest"

- 202087: Extended the timeout on the rate query and users now get a warning when they perform a potentially lengthy rate query [CR0136884]
For example when running the rate query for 99 nights:

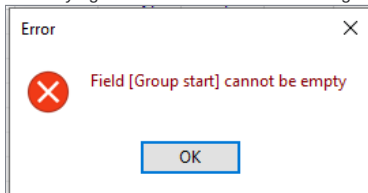

- 202108: Fixed an error that occurred when clicking on a commission posting line in the PMS [CR0136906]
- 202133: Fixed an issue where email address field were populated differently when mailing the same invoice using 2 different workflows [CR0136844]
- 202169: The manual arrival date and manual departure date fields in a group reservation are now mandatory when the banqueting module is active [CR0137048]
To prevent group reservations being archived while they should not be.

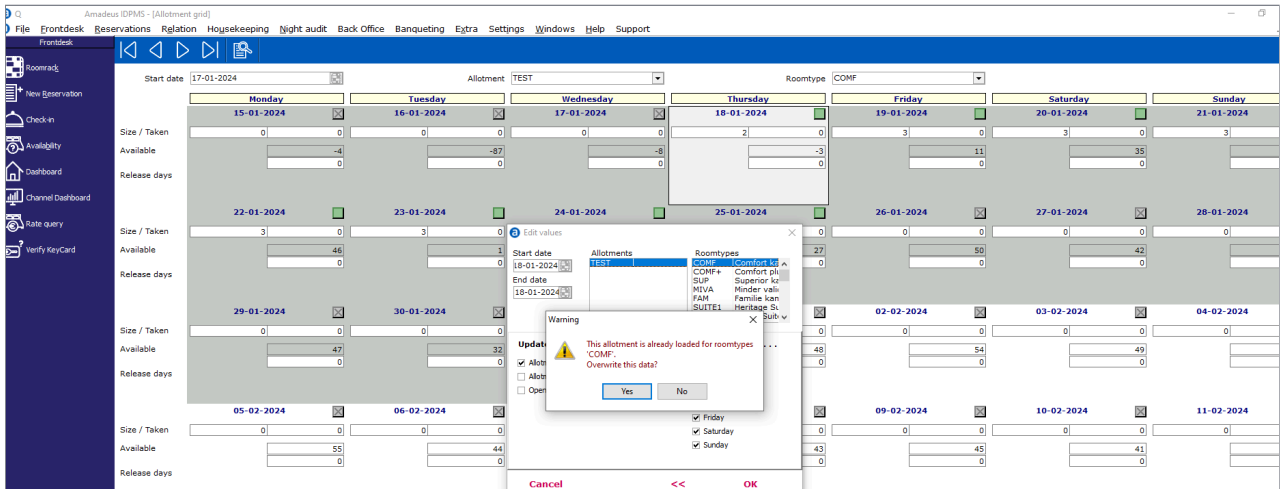

The screenshot shows a reservation form with the following fields:

- Event: [Blank]
- Guarantee: [Blank]
- Bill: [Blank]
- Alternative: [Blank]
- Memo: [Blank]
- Event type: Brunch
- Description: Brunch
- Pax expected: 300
- Noticeboard: Zondagsbrunch
- CXL release date: - -
- Group start: 01-01-2024
- Group end: 31-01-2024

When trying to store a reservation without group start, an error is displayed:

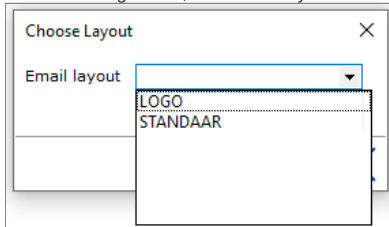

- 202178: Data in the allotment grid for a virtual room type will now be correctly updated/deleted when loading the same allotment for a non-virtual room type (and vice versa) [CR0136955]
It is no longer possible to use both Room types and Virtual room types in the allotment grid.

- 202764: The dropdown for choosing the invoice layout will now be correctly filled when designating the default print layout for invoices [CR0137096]

Back office > Invoices > Invoices

When choosing "Print", the invoice layout was not displayed. Issue is fixed, it is now possible to select the configured invoice layouts again:

- 203105: Refreshing of the room rack has been improved to prevent unwanted changes to reservations that have been edited on another workstation while the roomrack was opened [CR0137145]

No longer possible to drag and drop reservation on Roomrack after check-out. Reservation is now greyed out.

	Sun 14-01	Mon 15-01	Tue 16-01	Wed 17-01
Sunday 14 January 2024				
1				
0201 COMF	Slujs	Amad	Amada	
0202 FAM	Tuijn	Verbo		
0203 MIVA		Polen		
0204 COMF+	Holsbe			

- 203201: Made postings are now retained in the "Charge general" window until the form is closed

In 4.1.8 the made postings disappear after changing the room number. This was incorrect and is now fixed. All made postings are retained in the logging panel until the form is closed.

Post to folio -F31260

Room: 0301

Sub folio	Payment	Balance
<input checked="" type="radio"/> Subfolio A	Contant	206,54
<input type="radio"/> Subfolio B		0,00
<input type="radio"/> Subfolio C		0,00
<input type="radio"/> Subfolio D		0,00

PLU: 253

Article: Wasserij

Description: Wasserij

Reference:

Price: 0,00

Quantity: 1

Total: 0,00

Folio	Room	PLU	Article	Quantity	Price	Amount
F31337	0208	253	Wasserij	1	15,00	15,00
FX51770	0210	253	Wasserij	1	20,00	20,00
F31260	0301	253	Wasserij	1	40,00	40,00

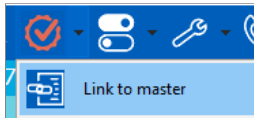

- 203269: The daily rates in reservations are now correctly populated when changing the start date of the used package in that reservation [CR0137094]

- 203488: Users should now be able to transfer payments from a reservation to another reservation again [CR0137153]

- 203496: Reservations can now be linked to future reservations again [CR0136911]

Linking to future reservations is possible again.

Select "Link to master"

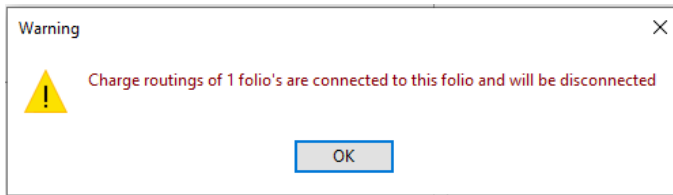

and use the filter option to find the correct reservation. For example filter on Guest:

- 203725: Changed a label name for "extras" so it's now the same as the menu item it originates from
Settings > Financial > Extras
Corrected typo

Code	Description	PLU
3GKD	Drie gangen keuze menu oak	3050
ANNUL	Annuleringsverzekering	301
ARR	Aanvulling arrangement	100
BB	Babybed	100
BR-TOESL	Brunch i.p.v. ontbijt	2103
BRUNCH	Zondagsbrunch	2103

- 205109: The NOTLOCAL function in chargeplans (which is used for determining if local taxes should be posted) is now case-insensitive [CR0134123]
If the city in the guest profile is not uppercase then the NOTLOCAL function in the chargeplans was not evaluated correctly. This is now case-insensitive. Although not possible to insert a city in lowercase in the PMS it sometimes comes in from CWI/OTA like that.
- 205387: Fixed the auto-update functionality in the PMS
- 203853: An error that was introduced with the move from version 10 to version 11 of the Delphi development platform has been resolved
- 205904: Resolved an issue where it was impossible to successfully perform a credit card transaction using decimal values for American Express and VISA cards
- 205958: The "Charge General" form is now no longer closed after completing a credit card transaction using Adyen
- 206404: When cancelling a reservation any charge routes to that reservation will be deleted so items are no longer routed to a cancelled reservation [CR0134721]
Routing is erased when Master is cancelled. Message is shown: "Charge routing of X folios are connected to this folio and will be disconnected".

- 206411: The amount to pay when checking in a reservation that has a balance is now correctly calculated [CR0137222]
- 206416: Rate no longer changes to 0.00 when adding a travelagent that contains a default rate type to a reservation [CR0137250]
- 206447: Fixed an issue where extras were not charged on departure day in case the charge type of that extra was set to 0 [CR0137424]
- 206567: The noticeboard field in activities is now correctly updated when changing its master-activity [CR0137486]
- 206875/207196: Resolved a bug where an extras was incorrectly calculated twice on a proforma when not posted on subfolio A of a reservation [CR0137536]
- 207054: The column "Publish" is now correctly populated in the rate type overview [CR0137643]

- 207156: Mealplans are now correctly evaluated on extended nights for reservations that contain a package [CR0137651]
- 207172: When selecting a package without a package breakdown in a reservation, the PMS no longer produces an access violation error [CR0137680]
- 207390: The e-mail-body when sending an invoice from the PMS is now showing the logo in case it's configured [CR0137158]
- 207427: Fixed an issue where the autoupdate process would produce an error
- 207464/208441: Fixed an error that would occur when running the night audit

Bugfixes and enhancements after release (per version)

Version	Release date	NICC	Comments
4.1.9.75	12 Feb 2025	NICC-079430	<ul style="list-style-type: none"> • Bug_209672: [CR0138847] 4.1.9 Pilot: Unable to open roomrack in pilot version • Bug_209676: [CR0138859] 4.1.9 pilot: description of dates and days in English regardless of configuration
4.1.9.74	15 Jan 2025	NICC-078502	<ul style="list-style-type: none"> • Bug_209472: [CR0138708] Pilot 4.1.9: Extras not posted when charge type is NULL • Bug_209529: [CR0138743] 4.1.9 pilot: users unable to transfer posting from reservations • Bug_209532: [CR0138737] 4.1.9 Pilot: editor files incorrectly stored after change when saved in 4.1.9 • Bug_209557: [CR0138759] 4.1.9 pilot: No longer possible to manually post onto cancelled reservations <ul style="list-style-type: none"> • This was not a defect, but an unclear caption was used for the user right. Changed caption of user right from 'Post on checked out folio' to 'Post on departed and cancelled folio' • Bug_209646: Incorrect positioned control in user editor The position of the "Email reply address" edit control was positioned over the "Default agent for CRS"-control. This is now fixed.
